### COPPER AT HIGH MARK

Calumet and Hecla Goes Up to \$1,000 a Share.

UPWARD MOVE IN MARKET

Southwestern Railroads and Industrials Follow Copper in the Rise, and General Conditions Are Favorable for Further Strength-London Is Again a Buyer,

New York, Feb. 15.-While the course of the stock market to-day was more or less irregular when examined minutely, it was still, taken upon the whole, a complete reversal of that of the movement of prices at the preceding stock exchange session. Prices were generally higher at the opening than they closed yesterday afternoon, reacted under a resumption of yesterday's selling, which was particularly directed against one or two stocks, and seemed wholly in the nature of a "drive" at the market by speculators for the fall, and then turned strong and held so until the closing half hour of business, when they fell off somewhat on profit-taking.

disclosed in the last two or three days of Total sales business is certainly such as to present Call money, H., 6; low, 4%; close, 51/2. more ground for a cheerful view regarding the probable future of values than ha been recently entertained.

The market betrays an unmistakabl tendency to creep upward. On days whe quotations recede the large liquidation of stocks is induced, and on other days when the market advances, it does so in slow and gradual fashion, which indicate an accumulation of holdings rather than any mere retirement of speculative con tracts for the fall.

For reasons that lie open to everybody view, the market for the leading coppe stocks is conspicuously strong, and seem ingly sensational advances have bee made recently in the price of many of th securities. The quotation for the Ana conda Mining shares, which was at 27 less than a fortnight ago, stood at on time to-day at 3021/2, and in Boston th price of the country's premier copper min ing stock, that of the calumet and Hecl Company, rose to \$1,000 a share, much th highest price for the stock ever recorded

Drop in Missouri Pacific. The selling of Missouri Pacific stock.

Which was the weakest feature of the Eric stock. market to-day, forced the price of the security to the lowest level made for it in a long time; and while the movement Gen. Electric... was popularly attributed to the work of a Gt. North. pfd....... bear attack upon the market, there were also rumors that the decline represented Int. Met. pfd......

ther is still that the rise which has continued steady throughout a long period is due to the acquisition of a controlling interest in the road by a larger railroad system. It is true to the acquisition of a controlling by the road by a larger railroad system. stedly effective

but not greatly, firmer than they were yesterday, due, no doubt, to the payments by the local banks into the subtreasury under the government's call for the return of a portion of its special-deposit fund. Time money, however, was weaker than it has been for several days past. Doubt as to Bank Statement.

Views concerning the probable show ing in to-morrow's bank statement was somewhat mixed. The clearing-house institutions do not appear to have either gained or lost materially as a result of the week's operations, and the question of the loan account only refers, as usual, to a mystery. Financial transactions of the banks pertaining to the recent sales of short term notes will no doubt serve to complicate the bank return in a meas-

The news to-day of the Northern Paeific's decrease in gross earnings for the month of January of \$416,550 was, of course, in confirmation of the recent stories of interference with railway traffic in the Northwest by the rigorous con citions of the winter thus far.

The most important announcement of the day was not made until just as the stock market was closing, and so did not at all affect prices. It was to the effect that a permanent local banking house had sold wholly in France and in Germany an issue of \$29,000,000 of the 4 per cent fifteen-year debenture bonds he New York. New Haven and Hartford Railway Company.
Two conclusions very favorable to the

general stock market are obviously to be drawn from the fact. It is the first issue of long-time securities sold by an Ameri- Chi can railway company either in this cour try or in Europe for a very considerabl period. In the second place it must pow erfully increase the strength of our coun try's position at the moment in the for eign exchange market. It is said, more over, that the impression among investor on the Continent of Europe as the sound ness of the financial and business pos tion here has become so strong that ther will probably be no difficulty in the nego tiations of further sales of similar securi ties of this kind by our leading railwa

NEW YORK MONEY.

### WALL STREET NOTES

Tip on the New Haven Bond stock. Sale Deceives Traders.

Conservative Brokers Do Not Like Wide Fluctuations and Favor Re- nent, but came to the conclusion that for turn to Oid System of Quoting ture was to be apprehended. Stock on Basis of Price Per Share. Bullishness of N. Y. C. Explained.

New York, Feb. 15.-For some time be- Harriman origin. The traders argue that fore the market closed a few operators this was done to give the movement an Weekly Review of Trade will say to-morhad an inkling of the New Haven bond appearance of importance that it did not row: 188 sale, but not knowing that the bonds possess, and so instead of following the would be placed abroad, they concluded rise they cautiously sold a little stock tions the volume of business is well main-stocks held for good profits. than those who only heard of the transac-tion after the market closed, precede the adjournment of Congress, the

Brokers who on Thursday described the latter, unless the other had discovered market as a good one for the traders went something of a kind not at all antici-further to-day and expressed the opinion pated, should be the occasion for an upthat the strong undertone indicated that ward movement. the large interests felt encouraged over outlook for the enactment of currency legislation, the continuance of activity in curities abroad to enable the roads to pursue their present plans for the development of their properties.

"The real strength in St. Louis Southwestern," said one of the traders, "lies in the weakness in Missouri Pacific. Both are Gould stocks, but the Sage estate, which may be selling Missouri, has little or none of the other, and Southwestern preferred is not far from dividends."

About the beginning of the month Missouri, Kansas and Texas sold as low as keats, 10al2. souri, Kansas and Texas sold as low as 35½. Since then it has risen more than eight points, or practically 20 per cent, which is a very good advance within a period of about two weeks. To-day the buying did not seem to be as good as yesterday—and no wonder, in view of the extent to which the floating supply had already been cleaned up. The interests that have been accumulating the stock are not anxious to advance the price-quite the contrary—so when the market gets so well cleaned out that they cannot get more without bidding up the price sharply they drop out and wait for a reget more without bidding up the price sharply they drop out and wait for a reaction, or until speculators, getting tired of paying into their speculative stock, throw it over, adding that much to the floating supply. But the accumulation of the stock by strong interests makes periodically a condition favorable to the operations of traders who see an opportunity to squeeze the short interest. Such an opportunity has just been found and utilized and a weakened technical position of the stock is just what is wanted by those who are buying for permanent investment.
